EXPERIENCE UNIQUE TREASURES

Five special treasures in the Salzkammergut and Salzburg City reveal new perspectives and promise valuable experiences around nature, culture and cuisine.

Already back in imperial times, the SchafbergBahn cog railway would huff and puff across steep mountain meadows on its way up to the summit, while passengers of WolfgangseeSchifffahrt were even able to catch a glimpse of the train carriages from aboard ship. To this day, a sense of cheerfulness quickly catches hold, even if these nostalgic witnesses to the past have long since been powered by modern technology. It quickly becomes clear why guests of the Salzkammergut region don't just refer to their visit as a common-or-garden holiday, but rather a "summer escape".

You could fairly make similar claims about our other treasures in Salzburg, city of Mozart: In this case, we discover the MönchsbergAufzug lift and FestungsBahn funicular in the heart of the UNESCO World Heritage City. Both went into operation in the 19th century, quickly taking passengers to the top of the Mönchsberg in a matter of seconds. The forested city mountain is a genuine natural jewel of forests and meadows, secret pathways and stone stairways, ruins and stately homes. The interactive WasserSpiegel museum on the Mönchsberg is dedicated to yet another of the Salzburg AG Tourismus GmbH treasures, Salzburg drinking water.

ALL THE WAY TO THE SUMMIT!

Heavenly scenery with the SchafbergBahn cog railway

The ride on the SchafbergBahn cog railway all the way up to just below the 1,783 m summit takes around 35 minutes and you will probably wish it could last even longer, considering the extraordinary views you are treated to by this steepest cog railway in Austria: With every vertical meter and every curve, your perspective of the world changes. At the top, passengers have 11 different lakes at their feet and, in good visibility, are also able to enjoy the sight of the mighty Hohe Tauern and Grossglockner mountains. The train travels through meadows and forests, from St. Wolfgang across the provincial border between Upper Austria and Salzburg, to the Dorneralm siding (elev. 1,015 m). Here, the vintage locomotives have to refill their water tanks. The journey then continues to the Schafbergalm halt (1,363 m), which was renovated by Salzkammergutbahn GmbH true to the historical original. For the last ten minutes up to the Schafbergspitze mountain station (1,732 m), the SchafbergBahn cog railway once again huffs & puffs steeply uphill.

WELCOME ON BOARD

Ferries have been running on Lake Wolfgangsee since imperial times.

On May 20, 1873, the paddle steamer „Kaiser Franz Josef I.“ set sail for the first time. This 33-meters-long ship with its powerful paddle-wheels was regarded as a major technological achievement in its day. Now as then, this photogenic vintage ship shuttles between the towns of St. Wolfgang and St. Gilgen, and is one of the fleet’s main attractions.

As the biggest inland passenger shipping fleet in Austria, WolfgangseeSchifffahrt ferries invites guests to hop on or hop off spontaneously at seven different boat landings: Ports of call include Strobl, St. Wolfgang and St. Gilgen, along with a number of other beautiful spots. Elegant Jugendstil villas, turquoise waters, the midday chimes of a famous pilgrimage church and the views of the Zwölferhorn and Schafberg promise that pure, ineffable “Salzkammergut feeling”!

130 Years
FestungsBahn

HIGH ABOVE THE BAROQUE TOWERS OF SALZBURG

On the FestungsBahn to the joys of nature above the city's rooftops.

A little hidden away, the FestungsBahn is pressed tightly against the steep, rocky mountain deep in the heart of UNESCO World Heritage-listed Salzburg and at the foot of Hohensalzburg Fortress itself. It is ultramodern and one of the most popular methods of transportation in the city of Mozart. In the roughly 130 years of its existence, it has been used by passengers in order to conquer Salzburg's iconic sightseeing attraction in only 54 seconds.

First operating on water power, it began service in 1892: Even back then, the intention was to save visitors the steep slog on foot all the way up to the fortress. After multiple modernizatons, the FestungsBahn now proudly boasts being the oldest funicular in Austria still in operation today. As appealing now as ever.

ASTONISHING ART AND NATURE EXPERIENCES

Float high above the rooftops of the city of Mozart with the MönchsbergAufzug lift.

A 60 m tall lift inside the rock of the Mönchsberg, performing its duty now for over 130 years: In 30 seconds, the MönchsbergAufzug carries passengers from the Salzburg historic district up to one of the most spectacular photo points on the Mönchsberg. Here, amid this extensive green oasis in the heart of the city, culture, nature and cuisine enter into a unique and, in many regards, quite surprising symbiosis.

Together with the FestungsBahn, the MönchsbergAufzug is the only public transportation to the top of the Mönchsberg. This, in turn, is an unsurpassed natural idyll and delightful recreation area in the middle of the city. Whether walking, hiking, biking, jogging, trail running or bouldering: The Mönchsberg beckons you to enjoy outdoor exercise in combination with culinary stops and cultural forays. Visits to the Museum der Moderne, the WasserSpiegel, the "Sky Space" on the "Walk of Modern Art" and Hohensalzburg Fortress are highly recommended.

DISCOVERY TOUR ON THE TRAIL OF THE WET ELEMENT

In the WasserSpiegel on the Mönchsberg, immerse yourself in the secrets of water.

Water is a playful thing: It makes sense, then, that an exhibition focused on this wet element would also invite you to interact and experiment. Which is exactly what the WasserSpiegel does: In addition to numerous interactive stations, a laboratory gives children and teens the opportunity to conduct fun experiments as they explore water and its unique characteristics.
The location for this exhibition wasn't chosen by chance. In fact, there are very concrete reasons: It was here on the Mönchsberg, close to the historic Richterhöhe, that an imposing mountain reservoir for drinking water was constructed in 1950. It can hold up to 25 million liters of drinking water, is 8.5 m deep and is today part of the Water Museum. For decades, drinking water from springs and natural sources located in Salzburg's surrounding communities has been pumped to this mighty holding tank, before continuing on its journey into the city itself: the broad network of pipes extends 870 km - roughly the same distance as from Salzburg to Copenhagen. The drinking water then pours from the taps into Salzburg homes, clear, clean and fresh with no further processing necessary.
